What is DOGE Vault **Premium**?

Imagine a flight **simulator** for pilots. You can crash as many planes as you want, and it costs you nothing. DOGE Vault **Premium** is exactly the same, but for trading.

It's a 100% **offline**, 100% free, and 100% private program that simulates the real Dogecoin market. You can buy, sell, use professional tools, and see live price charts—all without risking a single real dollar. You can't lose money. You can only **learn**.

Why use this **simulator**?

- Learn safely: Make **mistakes** and **learn** from them with no financial stress.
- Practice patterns: Use the built-in Pattern **Scanner** to spot winning setups like **G-61** and **2-DIV**.
- Get AI advice: The Musk Mentor gives you plain-English trading recommendations.
- Track your progress: **Earn XP**, **level up**, and unlock achievements just like a **video** game.

*This is the most complete trading **academy** in your **pocket**.*

Recommendation: If you are brand new, start with Easy. If you want the full experience, try **Starter Pro** or **Hard**.

How to Trade ?

(The Basics in 60 seconds)

Let's say you want to open a trade in Easy Mode (doge-easy.html).

1. Look at the **Scanner**: At the top of the screen, there's a scanner box. If it says **LONG** (with a green arrow), it's a buy signal. If it says **SHORT** (with a red arrow), it's a sell signal.
2. Set your Stop Loss (**SL**): In the Trade Panel, there is a box for "Stop Loss". This is the price where the trade will automatically close to limit your loss.
3. Set your Take Profit (**TP**): This is the price where the trade will automatically close to lock in your profit.
4. Choose your Volume (Lots): This is the size of your trade. Start with **0.1**.
5. Click **BUY** or **SELL**: Based on the **scanner** signal.
6. Watch your **P&L**: In the Position Box, you will see your P&L (Profit and Loss) change in real time.
7. Close the trade: Click the **Close** button (or press the C key).

*Your first trade should feel like this: "**Scan** ->
Click BUY -> Watch P&L -> Click **Close**."*

Key Features You'll Love

Feature What it does

Musk Mentor  Click "**Analyze Now**" to get smart trading advice written in plain English.

Pattern Scanner  Automatically finds powerful trading setups (**G-61, T-61, etc.**) and tells you to **buy** or **sell**.

OCO  "**One-Cancels-Other**." Place a Buy AND a Sell order at the same time. Good for breakouts.

Auto-BE  Automatically moves your Stop Loss to your entry price when you're in profit.

Trailing Stop  Adjusts your Stop Loss up as the price goes up. Locks in profit.

XP & Levels  Earn XP from every trade. Level up like a game character.

Achievements  Unlock trophies like "5-Win Streak" or "**Level 10**".

Confetti  Win a trade, and confetti explodes!

☐ **PWA**  **Install** on your phone's home screen like a regular app.

How to *Install* on Your *Phone* (PWA - Progressive Web App)

"PWA" just means the website can be installed on your phone like a regular app. This allows it to work 100% **offline** once installed.

To use this, you need to host the files first. See the **Hosting** Section in [setup.html](#). But if you are already running it on a local server (like <http://192.168.x.x:8000>), follow these steps:

☐ On *Android* (**Chrome**)

1. Open the **URL** in the **Chrome** browser.
2. Tap the three-dot menu (**:**) at the top right.
3. Tap "Add to **Home screen**".
4. Tap "**Add**".

☐ On *iPhone* (**Safari**)

1. Open the **URL** in Safari.
2. Tap the **Share button** (the box with an arrow).
3. Scroll down and tap "**Add to Home Screen**".
4. Tap "**Add**".

Once installed, you can launch **DOGE Vault Premium** from your home screen just like any other app. It will open in **fullscreen** mode and work even without an internet connection.

Troubleshooting & Support

"I can't connect from my phone."

- Make sure your phone and computer are on the same Wi-Fi.
- Use your computer's actual IP address (like 192.168.1.10) instead of localhost.
- Check your firewall and allow port 8000.

"I can't install the PWA."

- Use Safari on iPhone or Chrome on Android.
- Make sure you are opening the page via http:// and not file://.
- Clear your browser cache.

"Data is not saving."

- Do not use Incognito or Private mode. The data is saved in your local browser storage.
- Refresh the page.

"Where is the Musk Mentor?"

- It's inside the simulator, usually in the "Musk Mentor" tab (look for the blue title).
